

Remote Control User Manual MMC4409

Product Description

YK2169–9C is a remote control for transmitting RF signal with a frequency of 433.92 MHz and modulation mode of OOK. This product has a display window of 8-segment digital tube, which can display a total of 9 channels from 0 to 8

Different channels can be freely switched by pressing the button, and different actions can be performed when the receiver receives different code values.

Function Description

1.Channel setting

a.Press "setup mode.

b.Press "O" in setup mode, channel value increases. When the channel value increases to 8, press the key again to start increasing from 0.

c.Press "23" in setup mode, channel value decreases. When the channel value decreases to 0, press the key again to start decreasing from 8. d.Press "63" in setup mode, the digital tube stops flashing for exiting setup

.Press of in setup mode, the digital tube stops flashing for exiting node.

2. Transmit code

Press any key among """"""""""" in non-setup mode, then remote starts to transmit signal, the red indicator in the lower right corner flashes fast to indicate it is transmitting. Release the key to stop transmitting and the digital tube stops lighting.

Product parameter

Model:	YK2169-9C
Working voltage:	DC12V
Working temperature:	-20°C - +60°C
Encoding mode:	Imitation learning code
Working frequency:	433.92MHz
Working current:	≤16mA
Number of channel	9

More information

Thank you for your support and purchase at we Moes, we are always here for your complete satisfaction, just feel free to share your great shopping experience with us.

If you have any other need, please do not hesitate to contact us first, we will try to meet your demand.
